YOU HAVE THE JOB.
NOW WHAT?

Most people become managers because they were good at their job. Then suddenly they are responsible for people, performance, priorities, difficult conversations and getting results through managing others.

Nobody gives you an instruction manual.

ARRIVE is that manual.

Written for new and recently promoted managers, this is a practical guide on what you need to know when you start managing people.

You'll learn how to:
Take control of your diary
Navigate politics without losing your soul
Delegate without losing control
Handle difficult conversations
Manage upwards with confidence
Get results through other people

No management theory. No corporate jargon. Just practical advice you can use on Monday morning.
